

DO YOU REALLY WANT A MASSIVE INCINERATOR AT SUTTON COURTENAY?

**IF YOU DO, then RECYCLE THIS,
IF YOU DO NOT READ ON**

At 10 am on October 19th 2009 Oxfordshire County Council Planning Committee is considering the applications to build incinerators at Sutton Courtenay and Ardley. The planning officers have recommended that both applications be approved. This has significantly increased the possibility of 2 incinerators being built in Oxon. All it needs is both applications to be passed by the Planning Committee!

**People Power can
influence this
decision.**

**COUNCILLORS ON THE PLANNING COMMITTEE
WILL BE INFLUENCED BY PUBLIC OPINION.**

PLEASE ENSURE THAT YOU CONTRIBUTE BY LETTER, EMAIL OR PERSONAL CONTACT.

All the contact details for the Planning Committee Councillors are at the bottom of this sheet. Communicate **to all of them individually** by:-

- a) Handwritten letters (most effective way to lobby)
- b) Computer written letters
- c) E-mails (although these are easily deleted)
- d) Personal contact

ALL MUST BE COMPLETED BEFORE THE PLANNING MEETING ON THE 19th OCTOBER.

In your letters you can just state that you object, but the more reasons you give the better. As well as your own concerns you may wish to include some of the following points:-

- a) Massive visual impact of the building on local historic landscape.
- b) Lack of comprehensive comparative site assessment.
- c) The proposal departs from several policies in the local development plan.
- d) Lack of study into the cumulative impact of adding a massive incinerator to the Power Stations and landfill site.
- e) Hazardous waste to be buried above an aquifer - 500 metres from the Thames and far too close to housing.
- f) Inadequate descriptions of emissions and hazardous waste chemical controls.
- g) Traffic, noise, dust and light pollution from transport and site operations.
- h) Possible long term adverse health effects causing great public concern.
- i) Once completed it will be locked into a 25 year contract with no break clauses and a complete lack of flexibility in future tackling waste needs.
- j) WRG has a poor record in delivering incineration on this scale in the UK.
- k) More environmentally friendly alternative technology is available.
- l) It is industrialisation of a greenfield site, contrary to Structure Plan Policy G1

**DOING NOTHING IS NOT AN OPTION
UNLESS YOU WISH TO SEE AN
MASSIVE INCINERATOR BUILT
AT SUTTON COURTENAY**

Contacts to send your objections to (please remember to contact all if possible)
